IN THE CLAIMS:

The claims are amended as follows:

1. (Amended) A wireless resource allocation method in a wireless communication system including a plurality of wireless terminals and a single access point having a bridge function, the method comprising the steps of:
 - (a) allocating a wireless resource to a corresponding wireless terminal and receiving data from said wireless terminal in said access point;
 - (b) performing a check to determine whether there is an error in said data which was received from said wireless terminal in said access point in the step (a); and
 - (c) sending an error occurrence message and allocating a wireless resource for retransmission of data to said wireless terminal simultaneously [within one frame] when said access point detects a data error in the step (b).
